

Friday 12th May 2023 - Year 3 Coding Morning

Year 3 worked fantastically during our Coding morning with Jack from Hyett Education. We used Lego spike to build Ferris wheels that used lights, motors and sounds. We followed instructions to build the Ferris wheel, then we used Spike Block Coding to program our Ferris wheels to move, play sounds and display messages. We had to test our algorithms along the way, making sure we debugged any issues with our code. Once we had finished this project, we showed our programming skills independently by making our own designs and testing our code. We made treehouses, cars and underwater scenes. Those who had made cars tested their algorithm in a race!

There was fantastic buddy work and lots of Year 3 could recall key programming vocabulary.

Well done Year 3!
