

Years 3 and 4 had a fantastic day learning all about Germany! We started the day by looking at the geography of Germany, learning about it's capital city, landmarks and weather. We then tried our hand at a little German, learning how to say 1-10.

After break, we made our own German sun-catcher with tissue paper and a silhouette of the famous German landmark, the Brandenburg Gate.

Our afternoon was all about celebrating a traditional German carnival! We designed our own masks then went into the hall to play some traditional German games, all sound tracked by traditional German folk music of course!
